EDL-GEN CONDUCTS ESG TRAINING TO STRENGTHEN SUSTAINABILITY PERFORMANCE: FROM POLICY TO PRACTICAL IMPLEMENTATION

EDL-GEN

Vientiane Capital, 16–17 November 2026 – EDL-Generation Public Company (EDL-Gen) organized a two-day internal training program under the theme “ESG: From Policy to Excellence Execution” at the main conference hall of Electricité du Laos (EDL) headquarters.

The training was attended by departmental management teams, hydropower plant management teams, and relevant employees.

The training program was honored by the presence of Mr. Khambai Louangxay, Deputy Managing Director for Finance of EDL-Gen, who attended both the opening and closing ceremonies.

During the opening ceremony, EDL-Gen's management emphasized that, in today's business environment, Environmental, Social, and Governance (ESG) principles have become an essential framework for sustainable organizational development.

The training program featured two distinguished guest speakers: Mr. Chatchawan Orawongsuphatat, a personal data protection legal consultant, lawyer, and ESG management specialist; and Mr. Sanguansak Nakhan, Director of the Safety and Occupational Health Division of the Provincial Electricity Authority (PEA), Thailand.

Both experts shared their knowledge, professional experience, and practical approaches to integrating ESG principles into actual business operations.

Key Training Topics

The training program covered five key areas:

1. Sustainability Principles and ESG Integration within the Organization
2. Corporate Governance and Good Management Practices
3. Integration of ESG into Business Operations
4. Current ESG Challenges
5. Practical ESG Implementation and Strategic Planning

In addition to theoretical presentations, the training program included interactive question-and-answer sessions, knowledge-sharing discussions, and practical workshops. These activities enabled participants to analyze key issues, identify relevant stakeholders, and develop a preliminary sustainability strategy map for the organization.

During the closing ceremony, EDL-Gen's management highlighted that, throughout the two-day training program, participants had gained valuable knowledge and practical experience across various aspects of sustainability. These ranged from fundamental sustainability principles and the roles of the Board of Directors and executive management in integrating ESG into corporate strategy to the practical application of ESG principles in daily operations, drawing on case studies from Thailand's Provincial Electricity Authority (PEA).

The training program not only enhanced employees' knowledge and understanding of ESG but also laid an important foundation for translating sustainability policies into concrete actions supported by clear action plans, objectives, and performance indicators.

This initiative represents an important step toward strengthening EDL-Gen as an organization committed to good corporate governance, transparency, and accountability, while creating long-term value for shareholders, society, and the nation.

On this occasion, Mr. Khambai Louangxay also presented certificates of completion to participants in recognition of their successful completion of the training program.
